

Cloud Town — Episode 86

The talking friends

AWS AI. Nine friends that see, hear, write, and learn.

Oh no! Maya shows a picture and talks, and nobody in the room understands her! Welcome back to Cloud Town, high up in the sky! This is Episode 86. Meet the talking friends. The eye looks at a picture and says what it sees. The ear listens and knows if you are happy or sad. The bell reads cards out loud. The quill writes down what it hears. The bridge turns your words into another language. The window pulls drawings off a paper. The parrot chats back. The owl finds the one card you need. And the little robot? It learns by watching, and gets better every day. That is AWS AI: Rekognition, Comprehend, Polly, Transcribe, Translate, Textract, Lex, Kendra and SageMaker. Now you know the talking friends! See you next time in Cloud Town, high up in the sky!
