

Cloud Town — Episode 78

The library

AWS analytics. From a mountain of notes to one picture.

Oh no! Maya has a mountain of notes, and no idea what they say! Welcome back to Cloud Town, high up in the sky! This is Episode 78. Meet the library. The sticky-pot cleans the cards and stacks them neat. The river chute brings new cards as they come. The reading lamp finds the answer in a pile, no sorting needed. The pointer bird darts to the one card you want. The ant crew moves a whole mountain of cards in minutes. The tall tower keeps millions in tiny drawers. And the easel paints the answer as a picture. That is AWS analytics: Glue, Kinesis, Athena, OpenSearch, EMR, Redshift and QuickSight. Now you know the library! See you next time in Cloud Town, high up in the sky!
