

The neighborhood

A fence, a front street, a backyard, and a tunnel home.

VOICE-OVER (COPY THIS)

Welcome back to Cloud Town, high up in the sky! Meet Vivi the fence. A VPC is our own private neighborhood. Front street is public. The backyard is private. Iggie is the Internet Gateway, the big front gate! Albie the doorman greets visitors on the public street. Eddie the computer and Dot the vault hide in the backyard. Nat the mail window lets Eddie go out, but strangers cannot come in. That's egress! A sky bridge links another town. A secret tunnel reaches a house on the ground. Now you know the neighborhood!

TIMED LINES

0:00.00 – 0:02.80	Welcome back to Cloud Town, high up in the sky!
0:02.80 – 0:04.30	Meet Vivi the fence.

0:06.90 – 0:08.20	Front street is public.
0:08.20 – 0:10.00	The backyard is private.
0:10.00 – 0:13.10	Iggie is the Internet Gateway, the big front gate!
0:13.10 – 0:16.10	Albie the doorman greets visitors on the public street.
0:16.10 – 0:19.30	Eddie the computer and Dot the vault hide in the backyard.
0:19.30 – 0:23.10	Nat the mail window lets Eddie go out, but strangers cannot come in.
0:23.10 – 0:24.30	That's egress!
0:24.30 – 0:26.30	A sky bridge links another town.
0:26.30 – 0:28.80	A secret tunnel reaches a house on the ground.
0:28.80 – 0:30.00	Now you know the neighborhood!

CHAPTERS

0:00.00 – 0:06.00	VPC fence
0:06.00 – 0:12.00	Public · Private
0:12.00 – 0:18.00	Internet Gateway
0:18.00 – 0:24.00	NAT · egress
0:24.00 – 0:30.00	Bridge · tunnel

NEIGHBORS (KID WORD = AWS)

Vivi = VPC

The fence

Your own private neighborhood in the sky.

A VPC is a Virtual Private Cloud — a fenced town that belongs to you. Everything inside (streets, computers, vaults) is yours. Other towns cannot wander in unless you build a bridge or a tunnel.

Albie = ALB

The doorman

Lives on the public street. Greets visitors and sends them to the right house.

Albie is an Application Load Balancer. He stands on the public subnet, the front street with a door to the internet. Friends arrive at Albie first. He checks they are welcome, then sends each one to a healthy Eddie.

Eddie = EC2

The shop in the backyard

Builds the website. Lives on the private street so strangers cannot knock.

Eddie still is EC2, but now you can see where he lives. In a real neighborhood he sits in a private subnet. The internet cannot reach him directly. Only Albie may talk to him.

Dot = Database

The vault

Hides in the private backyard. Visitors never meet her.

Dot is the database. She keeps the real treasure. She lives only in a private subnet, with no door to the internet. Eddie may whisper to her. A stranger at the gate may not.

Iggie = Internet Gateway

The big gate

The only door between Cloud Town and the whole internet.

Iggie is the Internet Gateway attached to the VPC. Public streets can use Iggie so visitors may come in to Albie. Private backyards do not plug into Iggie directly.

Nat = NAT Gateway

The mail window

Private computers may go out. Strangers may not come in. That is egress.

Nat is a NAT Gateway on the public street. Egress means going out. Eddie can send a letter through Nat and Iggie to the internet. A stranger cannot start a visit the other way.

QUIZ

1. Who lives on the public street and greets visitors?

Choices: Albie · Eddie · Dot

Answer: Albie (ALB)

2. Where should the database vault live?

Choices: Albie · Iggie · Dot

Answer: Dot (Database)

3. Who lets Eddie go out, but stops strangers coming in?

Choices: Nat · Albie · house

Answer: Nat (NAT Gateway)

4. What is the fence around the whole neighborhood?

Cloud Town · copyable voice-over script

Choices: Vivi · Iggie · Nat

Answer: [Vivi \(VPC\)](#)

RECAP

Albie greets. Eddie builds. Dot hides. Nat sends mail out. Iggie is the gate. That is the neighborhood.

Yes! Public street: Albie. Private backyard: Eddie and Dot. Iggie is the gate. Nat is egress. A bridge or a tunnel talks to other towns and home.
