

The other boxes

A backpack, a fridge, fancy cupboards, a door at home, and a spare.

VOICE-OVER (COPY THIS)

Welcome back to Cloud Town, high up in the sky! Sammy the Super Storage Box has a surprise. He has more than one closet! First, meet Eddie's backpack disk. That is EBS. It belongs to one Eddie and travels with him. Next, the shared fridge. That is EFS. Many Eddies can open it at the same time. These fancy cupboards are FSx. Way in the back is the deep freezer. That is S3 Glacier. Old drawings sleep here. It is cheap, and slow to open. A little door at home is Storage Gateway. And this is Backup, the spare-copy machine. Now you know Sammy's closets!

NEIGHBORS (KID WORD = AWS)

Backpack = EBS

Eddie's disk

A disk that belongs to one Eddie and travels with him.

Amazon EBS is a disk attached to one EC2 computer. If Eddie moves to another street, he can take the backpack.

Fridge = EFS

The shared fridge

Many Eddies open the same snack at once.

Amazon EFS is a shared file system. Lots of computers can read and write the same files at the same time.

Cupboards = FSx

Special cupboards

Windows, Lustre, NetApp, or OpenZFS — picky programs get their cupboard.

Amazon FSx is managed file storage in flavors. AWS looks after the cupboard for you.

Freezer = S3 Glacier

The deep freezer

Old drawings sleep here. Cheap, and slow to open.

S3 Glacier is cold storage. See Episode 2 for Instant, Flexible, and Deep Archive.

Door = Storage Gateway

The closet door at home

Open a door on the ground, and you are in Sammy's sky closet.

AWS Storage Gateway is a door at home that talks to S3, FSx, or backup in the cloud.

Spare-copy = AWS Backup

The spare-copy machine

One button, and every treasure gets a spare.

AWS Backup copies many kinds of boxes at once on a schedule.
