

The tidy notebook

AWS turns the pages.

Copy the Voice-over block. Timed lines are for editing. No storyteller kid in the picture — voice only.

VOICE-OVER (COPY THIS)

Welcome back to Cloud Town, high up in the sky! This is Episode 11. RDS is Amazon RDS. A tidy notebook with rows and columns. AWS turns the pages. You pick the brand. MySQL. PostgreSQL. And more. Eddie asks Dot in the backyard. Visitors never meet her. That is a private street. If one notebook gets sleepy, a spare waits in the other yard. That is Multi-AZ. A reading copy keeps the line short. That is a replica. At night, AWS photocopies the pages. Those are backups. AWS does the grown-up jobs. Now you know RDS!

TIMED LINES

0:00.10 – 0:04.38	Welcome back to Cloud Town, high up in the sky!
0:04.38 – 0:06.96	This is Episode 11.
0:06.96 – 0:10.38	RDS is Amazon RDS.
0:10.38 – 0:14.22	A tidy notebook with rows and columns.
0:14.22 – 0:17.47	AWS turns the pages.
0:17.47 – 0:19.68	You pick the brand.
0:19.68 – 0:21.66	MySQL.
0:21.66 – 0:23.82	PostgreSQL.
0:23.82 – 0:25.43	And more.
0:25.43 – 0:28.45	Eddie asks Dot in the backyard.
0:28.45 – 0:31.07	Visitors never meet her.
0:31.07 – 0:33.67	That is a private street.
0:33.67 – 0:38.87	If one notebook gets sleepy, a spare waits in the other yard.
0:38.87 – 0:41.25	That is Multi-AZ.
0:41.25 – 0:44.76	A reading copy keeps the line short.
0:44.76 – 0:46.97	That is a replica.
0:46.97 – 0:51.42	At night, AWS photocopies the pages.
0:51.42 – 0:53.67	Those are backups.
0:53.67 – 0:57.24	AWS does the grown-up jobs.
0:57.24 – 1:00.00	Now you know RDS!

CHAPTERS

0:00.00 – 0:17.47	Notebook
0:17.47 – 0:25.43	Brands
0:25.43 – 0:33.67	Backyard

0:33.67 – 0:41.25 Spare yard

0:41.25 – 0:46.97 Replica

0:46.97 – 1:00.00 Backups

NEIGHBORS (KID WORD = AWS)

Tidy notebook = Amazon RDS

AWS turns the pages

RDS is a notebook with rows and columns. You pick the brand. AWS turns the pages.

Amazon RDS is managed SQL: MySQL, PostgreSQL, MariaDB, SQL Server, and Oracle. You choose the engine and size. AWS patches, backs up, and fails over. Do not run the database on EC2 unless you must.

Eddie = Private backyard

Visitors never meet her

Eddie asks Dot in the backyard. That is a private street.

Put RDS in a private subnet. The app (EC2, ECS, Lambda) talks to it. The internet does not. Security groups allow only the app. A public RDS is almost never the SAA answer.

Spare yard = Multi-AZ

Already waiting

If one notebook gets sleepy, a spare waits in the other yard. That is Multi-AZ.

RDS Multi-AZ keeps a synchronous standby in another Availability Zone. Failover is automatic. The standby is for disaster, not extra read traffic. Use read replicas for reads.

Reading copy = Read replica

Keeps the line short

A reading copy keeps the line short. That is a replica.

A read replica is an asynchronous copy for SELECT traffic. It is not Multi-AZ. Promote a replica if you need a new writer. Cross-Region replicas help disaster recovery and local reads.

Night photocopies = Automated backups

AWS copies the pages

At night, AWS photocopies the pages. Those are backups.

RDS automated backups plus transaction logs let you restore to a point in time. Manual snapshots stay until you delete them. Encryption uses KMS. You do not patch the OS — AWS does the grown-up jobs.

QUIZ

1. What is the tidy notebook AWS turns the pages for?

Choices: Tidy notebook · Spare yard · Reading copy

Answer: Tidy notebook (Amazon RDS)

2. What is a spare notebook already waiting in the other yard?

Choices: Spare yard · Reading copy · Night photocopies

Answer: Spare yard (Multi-AZ)

3. What is a copy just for reading so the line stays short?

Choices: Reading copy · Spare yard · Eddie

Answer: Reading copy (Read replica)

4. What are the night-time photocopies of the pages?

Choices: Night photocopies · Tidy notebook · Eddie

Answer: Night photocopies (Automated backups)

RECAP

Private backyard. Spare yard. Reading copy. Night photocopies. AWS turns the pages.

Yes! RDS is the tidy notebook. Multi-AZ is the spare yard. A replica is for reading. Backups are night photocopies.

AWS turns the pages.
