

The unwrapped snack

ElastiCache. Redis or Memcached. Not the vault. Not DAX.

VOICE-OVER (COPY THIS)

Welcome back to Cloud Town, high up in the sky! This is Episode 16. Repeats should not knock on the vault every time. Eddie can grab a snack instead. ElastiCache is the unwrapped snack. Redis or Memcached. A snack already open. Redis can remember a list. Memcached is a simple tray. If the snack tray tips, the real notebook still has the recipe. Dot is safe. The snack is not the vault. DAX is a snack only for cubbies. ElastiCache can sit in front of notebooks too. Hot reads come instantly. Snack tray. Not the vault. Now you know the unwrapped snack!

41.14 – 43.95 Hot reads come instantly.
43.95 – 60.00 Now you know the unwrapped snack!

NEIGHBORS (KID WORD = AWS)

Unwrapped snack = Amazon ElastiCache

Repeats come instantly. A snack already open.

Remembers a list = Redis

A tidy tray that can keep a list.

Simple tray = Memcached

A simple snack tray.

Not the vault = Cache vs database

If the tray tips, the notebook still has the recipe.

Only for cubbies = DAX

DAX is a snack only for DynamoDB. ElastiCache can sit in front of notebooks too.
