

The wide cubbies

Keyspaces. Cassandra-style. One name, a long row of slots.

VOICE-OVER (COPY THIS)

Welcome back to Cloud Town, high up in the sky! This is Episode 19. Dynamo cubbies grab by name. One toy per cubby. Keyspaces is wide cubbies. One name, then a long row of slots. Like Cassandra. A whole week of drawings stay in one wide cubby. You can peek a slice. You do not hunt the whole town. Eddie talks Cassandra talk. AWS keeps the house. You do not build it yourself. Many towns can share the wide cubbies. Super wide. Super fast. Now you know the wide cubbies! See you next time in Cloud Town, high up in the sky!

NEIGHBORS (KID WORD = AWS)

Wide cubbies = Amazon Keyspaces

One name, then a long row of slots.

Like Cassandra = Apache Cassandra compatible

Eddie talks Cassandra talk.

Peek a slice = Clustering / wide row

A week of drawings in one cubby. You do not hunt the whole town.
